

1" O.D. Heavy Duty Stainless Steel Grab Bar with Concealed Mounting

Product Materials

FLANGES: 3" dia. 14-gauge stainless steel.

ESCUTCHEONS: 22-gauge stainless steel. One-piece drawn construction with exposed surfaces in architectural satin finish. Snap over flanges to conceal mounting screws.

TUBING: 1" O.D. 18-gauge stainless steel, seamless construction with exposed surfaces in architectural satin finish. Bent ends of tubing pass thru the flanges and are welded for maximum strength. Intermediate supports are contour cut and joined by welding to form an integral part of the grab bar. All welds ground and polished to blend. Mandrel bending process maintains uniform bar diameter. Return provides 1½" standard safety clearance between wall and bar.

Strength

When properly mounted, all Bradley heavy-duty grab bar systems meet or exceed the requirements of ANSI Standard A117.1, the ADA and ABA Accessibility Guidelines for Buildings and Facilities (ADAAG), and the Uniform Federal Accessibility Standard (UFAS). All 852 grab bars are rated to support up to 250 pounds. Wall must be reinforced in the area of the grab bar in order to support the load it is intended to support.

Guide Specification

Grab bar shall be satin finish stainless steel with concealed mounting flanges in sizes and configurations as indicated. Install with Bradley Mounting Kits as indicated.

Installation

For instructions on installation, warnings, and maintenance, please visit www.bradleycorp.com.
